

Sasol South Africa Enterprise Supplier Development (ESD) Policy

Write up:

As an organisation committed to the socio-economic upliftment of our communities, particularly in the areas where we operate, it is imperative that we are intentional in how we develop, support and contribute to the sustainability of Small, Medium and Micro Enterprises (SMMEs) as well as firms owned by Historically Disadvantaged Persons (HDPs).

To that end, Sasol is pleased to introduce the Sasol South Africa Enterprise and Supplier Development (ESD) Policy, which outlines our organisation's commitment to economic transformation in South Africa as well as our commitment to leveraging our integrated supply chain to create shared value for our SMMEs.
